## **ANNUAL REVIEW**

## **SEND Information Report 2023-2024**

This Special Educational Needs and/or Disability (SEND) Information Report has been compiled using the information required as set out in the Special Educational Needs and/or Disability Code of Practice and Regulations 2014. **SEND Broad Areas of Need** (**Appendix A** of this information report provides more information).

The SEND Code of Practice: 0-25 years, details these as:

1. Communication and Interaction

- 2. Cognition and Learning
- 3. Social, Emotional and Mental Health difficulties
- 4. Sensory and/or Physical Needs

Range of Provision and inclusion information:		
How we identify special educational learning	Most students with special educational needs will	
needs as a school and how we seek the	have been identified at primary school. We liaise	
views, opinions and voice of pupils and their	with our feeder primary schools, who pass on	
parents in planning to meet them.	information regarding the students' needs and	
	strategies to support them. We work with primary	
	schools, students and parents/carers to ensure a	
	successful transition to The Heath. (See Admission	

	Policy on the school website for more information about applying for a place at The Heath). Once at The Heath, students' progress is monitored regularly. If it appears that a student is experiencing difficulties, we will investigate potential barriers to learning and, where appropriate, arrange for additional support or interventions. Throughout the year, parents and carers of students with identified SEND are offered the opportunity to discuss their child's progress and next steps with appropriate staff. We have an open door policy and encourage parents/carers to contact us if they have concerns rather than waiting for a scheduled meeting.
What extra support we bring in to help us meet SEND: specialist services, external expertise and how we work together. For example, health, social care, local authority support services and voluntary sector organisations.	We work closely with:  a) Halton Local Authority and their team of teachers with specialisms in visual impairment, hearing impairment, cognition & learning, social communication & interaction, physical disabilities and behaviour management. b) Halton Educational Psychology Service, who can offer advice, strategies and, where appropriate,
	statutory assessment. c) Partners in the NHS, including the School Nursing team, Community Paediatricians, Physiotherapists, Occupational Therapists, Speech & Language Therapists, Woodview Children's Centre and Mental Health Practitioners from CAMHS and the Mental Health Support Teams (MHST). d) The Ophthalmic clinic at Warrington Hospital. e) Halton Young Carers, Kooth, VIBE and other voluntary organisations when needed. f) Our partner schools within the Heath Family Trust

**ANNUAL REVIEW 2022-23** 

Completed by: Debs Gwynn Date: July 2023

## **SEND Broad Areas of Need**

	Communication and Interaction
6.28	Children and young people with speech, language and communication needs (SLCN) have difficulty in communicating with others. This may be because they have difficulty saying what they want to, understanding what is being said to them or they do not understand or use social rules of communication. The profile for every child with SLCN is different and their needs may change over time. They may have difficulty with one, some or all of the different
6.29	aspects of speech, language or social communication at different times of their lives.  Children and young people with ASD, including Asperger's Syndrome and Autism, are likely to have particular difficulties with social interaction. They may also experience difficulties with language, communication and imagination, which can impact on how they relate to
	others.

	Cognition and Learning
6.30	Support for learning difficulties may be required when children and young people learn at a
	slower pace than their peers, even with appropriate differentiation. Learning difficulties
	cover a wide range of needs, including moderate learning difficulties (MLD), severe learning
	difficulties (SLD), where children are likely to need support in all areas of the curriculum and
	associated difficulties with mobility and communication, through to profound and multiple
	learning difficulties (PMLD), where children are likely to have severe and complex learning
	difficulties as well as a physical disability or sensory impairment.
6.31	Specific learning difficulties (SpLD), affect one or more specific aspects of learning. This
	encompasses a range of conditions such as dyslexia, dyscalculia and dyspraxia.

## 6.32 Children and young people may experience a wide range of social and emotional difficulties which manifest themselves in many ways. These may include becoming withdrawn or isolated, as well as displaying challenging, disruptive or disturbing behaviour. These behaviours may reflect underlying mental health difficulties such as anxiety or depression, self-harming, substance misuse, eating disorders or physical symptoms that are medically unexplained. Other children and young people may have disorders such as attention deficit disorder, attention deficit hyperactive disorder or attachment disorder.

	Sensory and/or Physical Needs
6.34	Some children and young people require special educational provision because they have a disability which prevents or hinders them from making use of the educational facilities generally provided. These difficulties can be age related and may fluctuate over time. Many children and young people with vision impairment (VI), hearing impairment (HI) or a multisensory impairment (MSI) will require specialist support and/or equipment to access their learning, or habilitation support. Children and young people with an MSI have a combination of vision and hearing difficulties. Information on how to provide services for deafblind children and young people is available through the Social Care for Deafblind Children and Adults guidance published by the Department of Health (see the References section under Chapter 6 for a link).
6.35	Some children and young people with a physical disability (PD) require additional ongoing support and equipment to access all the opportunities available to their peers.
